NOBILIS®
The Best Technology for Water

SIXTY YEARS OF INNOVATION

To mark its sixtieth birthday, Nobili refuses to resort to half measures and treats itself to a brand new unmistakable collection. The simultaneous appeal of a fresh and modern line is wrapped in an intense technological tradition forever present in the DNA of the brand: the innovation of the Nobili Widd® 28 cartridge is reflected in the everyday use of the mixer, that of saving water and energy.

ORDER AND EQUILIBRIUM. ABSOLUTE TECHNOLOGY.

Geometric proportions and cutting-edge technology. The new Acquaviva collection celebrates sixty years of innovation, making the most of modern captivating styling, with lines that are neat and well-balanced in every detail and from all points of view. It uses the best available technology, starting with the adoption of the Nobili Widd® 28 cartridge with its mere 28 mm diameter, the most advanced technological

expression in the sector, and so small. It uses the production quality of the Suno factory, where the entire collection comes to life, one component at a time, in futuristic and eco-friendly workshops. It respects the environment, adopting solutions capable of reducing consumptions, reducing management costs and saving the planet. The Acquaviva collection, happy birthday Nobili.

Pure style and harmony of form: the Acquaviva collection is available in four washbasin versions, (traditional mixer tap, wash bowl version or wall-mounted with 150 mm or 200 mm spout), bidet, bath, external shower and flush-fit shower versions and two sink versions. The adoption of the mere 28 millimetre diameter Nobili Widd® 28 immersion cartridge combines a greatly reduced cross-section with incredibly clean lines, and a tall outlet spout flush with the mixer body.

WASHBASIN

VV103118/1CR
Single control mixer tap

VV103128/2CR
Single control washbowl mixer tap

VV103198CR
Wall-mounted single control mixer
tap with 150 mm spout

VV103198/1CR
Wall-mounted single control mixer
tap with 200 mm spout

BIDET

VV103119/1CR
Single control mixer tap

BATH

VV103110CR
External single control mixer tap
with duplex

VV103110/1CR
External single control mixer tap

SHOWER

VV103130CR
External single control mixer tap

VV103100CR
2-way flush fit single control mixer

VV103108CR
1-way flush fit single control mixer

SHOWER HEADS

AD138/44CR, AD139/122CR
350 mm wall-mounted arm, swivel shower head 245 x 245 mm with rain jet

AD138/44CR, AD139/10CR
350 mm wall-mounted arm, swivel shower head ø 200 mm with rain jet

AD138/67CR, AD139/73CR
160 mm wall-mounted arm, swivel shower head ø 160 mm with rain jet

HAND SHOWERS

AD146/43CR
Water connection with single jet shower head

AD146/25CR
Directional support with single jet shower head

AD150/1CR
Water connection

AD140/49CR
650 mm wall rail with single jet shower head

SINK

VV103113CR
Single control mixer tap with swivelling body

VV103127CR
Single control mixer tap with swivelling body and two-jet pull-out shower head

THE HEART OF THE ACQUAVIVA MIXER

The Acquaviva collection has its own technological jewel, the only one of its kind in the world: the extraordinary Nobili Widd® 28 Water Immersion Dry Disc cartridge, designed and produced entirely in our own factories, the only cartridge capable of incorporating so many technological details in just 28 millimetres diameter. Technologies that guarantee unequalled reliability and very environmentally friendly use.

The Nobili Widd® 28 immersion cartridge allows reliability levels to be reached that were unimaginable up until now (torsional strength 18 Nxm, high pressure resistance to over 70 Bar). The water reaches the top of the mixer body flowing around the profile of the cartridge, thus drastically reducing mechanical wear: there are no internal limescale deposits and no grease is washed away. In this way, the lubrication of the plates remains unaltered and, furthermore, the low friction clutch system of the ceramic discs ensures an incredibly smooth movement of the lever. The dynamic flow regulator, maximum flow control, temperature limiter and the use of food-grade materials guarantee total respect for the environment.

Nobili Widd® 28 flow graph compiled by the Nobili laboratory on 26/04/2011.
Test conditions: cold water at 15°C, hot water at 65°C.

THE TECHNOLOGY

The technological efficiency and pure style of the Acquaviva collection are the result of the extremely high-tech heart with which it is fitted: use of the Nobili Widd® 28 cartridge, the only one in the world capable of housing so many innovations in just 28 millimetres diameter, signifies being able to design elegant and minimalist forms and at the same time reach the highest possible levels of eco-sustainability.

Dynamic flow regulator

The Nobili WaterSaving technology halves the consumption of water by applying a brake to the opening action of the lever at the half flow position (-50%). Once this slight resistance has been overcome, the mixer is free to output all the flow available.

Maximum flow control

The Nobili Blockade technology allows the user to decide on the maximum flow that the mixer tap can output. Once the maximum flow has been selected, simply place the corresponding insert in the cartridge.

Temperature limiter

Nobili EcoFresh technology prevents risks of scalding and at the same time reduces the consumption of hot water: the maximum temperature of the water output from the mixer can be varied by rotating a ring nut on the cartridge.

Fluid movements

The low friction of the clutch type ceramic discs avoids friction between the plates when the mixer lever is turned to the closed position, thus reducing wear of the plates and guaranteeing the soft fluid movement of the lever.

A brilliant finish

The gleaming polished finish is guaranteed by chrome plating values higher than the market standard: 15.0 µm of Nickel and 0.5 µm of Chrome. All the processes are carried out at our own factories in full compliance with environmental standards.

Neoperl® Cascade® aerator

A perfect flow of water in minimalist style: the Neoperl® Cascade® concealed aerator fitted to the Acquaviva collection supplies the ideal mix of air and water, increasing the jet pressure while reducing the amount of water output.

Non-twist plastic hose

The ideal component to provide that extra touch of perfection to the bathroom setting: the special metal-effect finish enhances the tap system, while the smooth surface prevents the annoying twisting typical of traditional hoses.

Parigi® Parinox® Softpex® hoses

The first flexible pipe approved anywhere in the world, thanks to its superior internal hygiene properties, its optimum resistance to temperature and pressure and its improved flexibility compared to pipes in traditional PE-X.

Support flange

The flange type support supplied with all our kitchen mixer taps extends the bearing area over the sink top and greatly increases stability, reducing any oscillation in particularly thin mounting surfaces.
